

# AmplifySystem

All for \$359\*

## K-12 Tablet

The Amplify Tablet  
Designed by  
Intel® Education

9+ hour battery life, 1.3MP front and 5MP AF rear cameras, micro-HDMI and micro-USB ports

## K-12 Software

**Integration with Student Information Systems (SIS)**

The Amplify System connects directly with a district's SIS to provide easy provisioning and personalization of student tablets.

Amplify works with Clever to make integration simple and allow for ongoing data compatibility.

**Exclusive instructional platform**

The Amplify System comes with intuitive instructional software, including:

- Real-time assessment tools to check for understanding
- Classroom management tools and controls
- Playlist Builder for easy digital lesson planning and content delivery
- Quiz Builder for creation, distribution and scoring of assessments
- Assignments for posting, submission and commenting on student work all in one place

\*Price includes purchase of tablet and first year of software, content and support. After first year, software, content and support cost \$60/year. Leasing option: \$160/year for 3 years. Additional leasing fees may apply.

## K-12 Content

### Open platform

The Amplify System is an open platform that can easily deliver third-party curriculum selected by a district. During implementation, we partner with

customers to load relevant content onto the tablets and then districts can self-serve to push new and updated content to tablets over the course of the initiative.

### Amplify Market

The Amplify Market provides students and teachers with a safe, highly curated K-12 app store. We partnered with Common Sense Media to offer access to a host of appropriate, high-quality educational apps

with educator reviews and ratings, lesson ideas, standards and skill alignment. Districts can also bulk-provision apps through Amplify Market, installing apps onto student and teacher tablets at scale.

## K-12 Support

### Implementation support

As part of our system, our Service team works hand-in-hand with districts to drive deployment and launch a successful program. We collaborate with the district to conduct relevant assessments and

oversee the program management of all aspects of the project, such as infrastructure, accessory selection, content planning, and ongoing technical and pedagogical support.

### App and web filtering

The Amplify System is designed for 24/7 learning, with web filtering, app blocking and usage policies all enforced remotely

over the air, and no need for overnight charging in sync carts.

### Mobile device management (MDM)

Amplify's MDM system is purpose-built for K-12 education and allows administrators to easily track, lock and wipe devices as

well as deliver new software, software updates and curricular content to tablets, over the air 24/7.

### Customer support

A highly knowledgeable help desk staff is available by toll-free phone number from 7 a.m. to 8 p.m. Eastern Time weekdays and Saturday 10 a.m. to 4 p.m. In addition to the toll-free number, Amplify offers the same expert support over email or via

an online user community directly from the Amplify Tablet or any computer or mobile device. The help desk is available to students, teachers, administrators and technical staff.

Please note that Amplify may change the hardware specifications, software, content and support included in the Amplify System in order to provide customers with improved technology and features as they become available.
